U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Pap r No. / 8

Application/Control Number: 09/171,732 Page 2

Art Unit: 3764

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Varn.

Varn discloses in figures 1-8 an orthopedic splint comprising a covering section (60, 64), stabilizer sticks (18, 20), tie strips (78, 86, 88), a padding 92, for the calf and hook and loop means 93 that fasten the padding around the thigh. Thus, fastening the padding on the inside of the covering. The padding protrudes beyond the covering (fig.4, shows 92 protruding beyond the covering).

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Neal.

Neal discloses in figures 1-3 an orthopedic splint comprising a padding 10 that has a bifurcated end 30.

Application/Control Number: 09/171,732 Page 3

Art Unit: 3764

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Meier.

Meier discloses in figures 1-3 a padding 20 comprising a bifurcated end (the open end of the device at reference number 28).

Claim Rejections - 35 U.S.C. § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grim '543 in view of Moore, along with Grim '979.

Grim '543 discloses in figure 8 a covering 48, stabilizing sticks (34, 36), tie strips (40, 56), a pad 74 for a calf and a brace 76 reinforcing the pad. However, Grim '543 is silent about what material the pad is made of. Moore teaches in figure 1 an orthopedic brace having a pad that is made of foam. The foam is braced by a stabilizing stick 36 that is made of metal. Grim '979 teaches in figure 8-9 an orthopedic splint comprising stabilizing sticks 424 that are made of

Application/Control Number: 09/171,732

Art Unit: 3764

plastic. It would have been obvious to one having ordinary skill in the art at the time that the

invention was made that the calf pad as disclosed by Grim '543 could be fabricated of foam as

taught by Moore. The foam is a durable, supportive material that will provide support to the calf

without causing chafing of the skin on the calf. The brace disclosed by Grim '543 could be made

of plastic as taught by Grim '979 because it is durable and inexpensive material to use to support

the calf pad.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Michael Brown whose telephone number is (703) 308-2682.
